Go and do likewise (Lk 10,37)

Ensure that no life is discriminated against or marginalized, like the Samaritans who cared for the suffering and vulnerable

Education with a Philosophy

Educational Goals

As the Mecca of Character Formation Education, Catholic Medical College cultivates true medical professionals based on three core philosophies: Mission, Competence, Leadership.

The Catholic philosophy, which serves as the foundation of education, provides a solid groundwork for nurturing doctors equipped with good character, intellect, and spirituality who contribute to our society.

The Right Path towards the Right Goal OMNIBUS OMNIA Curriculum

Curriculum

The work of medicine extends beyond medical skills.

The unique philosophy of our university, embodied in the "OMNIBUS OMNIA" curriculum, which means 'all thing to all men,' reflects our unwavering commitment to provide the right education without sparing anything.

Through this curriculum, we guide healthcare professionals toward the true direction they pursue.

Creating Exceptional Healthcare Professionals in a Stable and Efficient Learning Environment

Catholic Institute for Applied Anatomy
International Bioskills Education Center

Catholic Institute for Applied Anatomy and International Bioskills Education Center cultivate skilled medical professionals through anatomical and clinical bioskills education and research using donated cadavers. We are dedicated to provide anatomical education for medical students as well as continuing education for graduate doctors, solidifying our position as the nationally recognized premier anatomy research institute in South Korea.

More Opportunities, Better Environment

Educational Environment

Medical Library

We provide an optimal environment where students can freely enjoy whatever they want, whether it be academics or exercise. This includes a cutting edge medical library that offers more than two hundred thousands books and over 21,000 online and offline journals and a playground for various indoor exercises, as well as a learning ground that provides a quiet studying environment. We always prioritize the happiness of our students.

A Well-rounded Medical Student's Life

Club Activities

Do you think medical students do nothing but study? Absolutely not! Whether it's dancing, playing an instrument, or creating art works, we excel in every aspects. Sharing diverse interests and talents, we are the true medical students! Catholic Medical College supports various club activities, ranging from religion, volunteering, music, sports, hobbies, to academics.

Into a Deeper World with Global Neighbors

Office of
International Affairs

Beyond the boundaries of school and across nations, our learning expands far and wide. With a foundation rooted in the education of over 1600 Catholic universities worldwide, we foster an open-minded global perspective through international exchange, medical volunteering, and student exchange programs. Since its first dispatch of international volunteers to Papua New Guinea in 1997, Catholic University has consistently engaged in volunteer activities for medical assistance in countries worldwide, including Mongolia, Laos, Cambodia, and wherever medical services are needed.

The first Step to becoming a doctor, I am a CMC student.

“We encourage you to develop a habit of asking questions and acquiring vast medical knowledge within your framework. Additionally, as important as acquiring knowledge is, building genuine relationships with people and having the willingness to share and contribute is equally crucial.”

Fr. Giheon Seong
Professor
Department of Humanities and Social Medicine,
College of Medicine, The Catholic University of Korea
